
Real landscape (UAV multispectral mosaic, red-green-blue bands, 0.5 m; dots = measured SOC) and virtual landscape
(SOC simulated at 2.5 m, conditioned on the field points, with the observed distribution and variogram). SIRGAS 2000 / UTM 23S
a Native vegetation (NV): real landscape
b Virtual landscape (simulated SOC stock)
c Integrated crop-livestock (ICL): real landscape
d Virtual landscape (simulated SOC stock)
e Integrated livestock-forest (ILF): real landscape
f Virtual landscape (simulated SOC stock)
